ALUMALATH — THE METAL LATH HOUSE

OUTSTANDING FEATURES

Alumalath won't warp, crack, burn or change form regardless of weather. Easy to erect. Light weight (about 1/10th that of wood). Minimum under support required.

NEW PATENTED ROOF GIVES UP TO 3 HOURS MORE SUNLIGHT

A unique method of roof construction using specially designed Stringers develops a uniform curve of sunlight intensity throughout the day. Yet reduced sunlight is admitted mid-day.

PRICED AT ONLY

\$58.25*

The new Alumalath Lath House is built from shining baked plastic coated aluminum lath—cut to the required size so that you can easily erect this beautiful and durable lath-house. Standard sized house 10'x10'x8' high.

*This price does not include wood frame. Standard prefabricated frames available.
